

Visokio Schedule/Service configuring schedules tasks workflow

Visokio Scheduler Running

Scheduler log: <http://localhost:24679/>

Edit scheduler configuration

Configuration File Path: C:\Users\[REDACTED]\scheduler\config.xml

Scheduled tasks: [List of scheduled tasks]

Server port: 24,679

Fork Scheduled Execution: [Description]

Log Debug: [Description]

Log Detail: [Description]

Watch Folder: [watch]

Watch Polling Interval: 40

Save and apply **Cancel**

The Scheduler/Service configuration interface. Click "Edit tasks, schedules and settings" to create/edit schedule an operation you want to perform automatically at predefined times.

Dialog which allows you to schedule a series of Tasks. A task is an action that you want to perform at a particular time. A task is the name given to a series of Actions which can be a single action, or a series of actions which is called a Chain action. To add a new Task click Add button.

Edit scheduler configuration

Configuration File Path: C:\Users\[REDACTED]\scheduler\config.xml

Scheduled tasks: "New task" Chain of actions, every day from 09-Jul-2012 13:45

Server port: 24,679

Fork Scheduled Execution: [Description]

Log Debug: [Description]

Log Detail: [Description]

Watch Folder: [watch]

Watch Polling Interval: 40

Save and apply **Cancel**

The final dialog, now shows the name of the task "New task" (brown circle), the name you gave to the task in the Add Task dialog, the name also contains the name of the Action (green circle) and the schedule time. Clicking on Save and apply saves the configuration.

Set Action "Chain Action"

Please choose a type of Action:

- File Action
- Execute Command Action
- Diagnostics Action
- Resource Action
- Delete Action
- Send Email Action
- Create Timestamp
- Chain Action**
- Wait For File
- Clear Disk Cache Action
- Auto Submit Bug Report
- Create Link File

In order to create a task you have to select an action this task is going to perform. An action is an operation you want to perform. There are various kinds of operations you can perform. If you want to perform a series of actions, choose "Chain action" which groups a series of operations.

Actions

Failure Action

Log Timings

Authentication

Time out (seconds)

Propagate failure?

OK **Cancel**

The Chain action allows you to create a series of actions.

Title of this chain of actions: The name you want to give to a series of actions. This title appears in the Task dialog (see below).

Actions: A series of actions. To add actions click Add button. Note that you can only define the name of "Chain action", and not other types of actions.

Failure Action: Action to perform if any of the actions in the Actions section fails.

Add Task

Name: New task

Enabled:

Action: Chain of actions

Schedule: [List of recurrence patterns]

Time out (seconds): 300

Skip if delayed by: 0

OK **Cancel**

In this dialog, you can define the name of Task. This is the name that is shown in Edit scheduler configuration dialog. This allows you to define what is the task, for example, "Bond refresh demo". The dialog also allows you to define the schedule. The schedule states how often you want to run the task.

Note: The name you define Set Action "Chain action" (See green circles) dialog is shown next to the Action heading.

Once you have finished setting up the Task click OK.
